

SkillsPlan Explained

15 Week Programme with only 6 days in the classroom

The milestone based, structured learning plan will blend self study, mentoring and classroom workshops all geared to skills acquisition and exam pass.

Mentoring & Support

Our CCIE certified instructor, will facilitate the entire programme and workshops and will be accessible throughout via the group Discussion Forum and Wikis.

Materials

World-class self paced eLearning, virtual labs, books online, practice exams and much more, all accessed through our learning portal.

LEARNING SOLUTIONS THAT WORK FOR YOUR BUSINESS

The CCNP SkillsPlan offers you choice and flexibility as to how you learn. It is a truly blended learning experience, negating the need to attend the standard 15 day training programme for ROUTE, SWITCH and TSHOOT, or alternatively the crazy 8 day intensive boot camp. This fun, collaborative and fully supported initiative focuses on skills acquisition, & performance support and at a pace that suits you and your busy calendar.

The Logicearth CCNP Skills Plan:

- 3 x 5 week learning sections (ROUTE, SWITCH & TSHOOT)
- Each section will culminate in a 2 day classroom workshop with our CCIE instructor in Dublin and broadcast via Live-Meeting.
- Learning Plans for each section with mandatory and suggested courses, virtual labs and reading.
- Collaborate throughout with our instructor and other learners within the group through the discussion forum and wikis.

NEXT PROGRAMME: MAY 2011
